

## Questionnaire for the evaluation of Master's studies ETSEIB

The purpose of this questionnaire is to identify the strengths and weaknesses of the master you are studying. Briefly expose your opinions by valuing the items listed below:

**Assessment of the Studies:** respond by considering the following aspects.

- Did the level of the programme meet your expectations? Do you find it easy, normal, difficult?
- How is the level of effort required in the courses? Is it homogeneous?
- Is the information contained in the course guides of the subjects complete?
- Is there a coordination between courses? Did you detect any overlapping?
- Is the atmosphere generated among classmates enriching?
- Have you done internships during the master's degree? Curricular or extracurricular? Have they been interesting?
- How do you value the relationship between theoretical contents and practical contents in the programme?

**Assessment of the Teaching Staff:** respond by considering the following aspects.

- How is the teacher-pupil relationship generally?
- How do you value, in general, the masters' teaching staff? Knowledge of the subject? Motivation? Teaching techniques in the classroom?

**Assessment of facilities and services:** consider the following aspects.

- Are the classrooms where the classes of the master are taught appropriate?
- What do you think about the facilities offered by the School (computer rooms, laboratories, etc.)?
- Did you find all the information you need on the School website?
- Library.

**Assessment of management services:** respond by considering the following aspects.

- What do you think about the student support service (SIAE)?
- What do you think about the steps you have had to take (registration, e-secretary, etc.)?

## Global assessment of the Master in Nuclear Engineering

- What is your overall assessment of the master? Would you do it again?

<b>0</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>4</b>	<b>5</b>	<b>6</b>	<b>7</b>	<b>8</b>	<b>9</b>	<b>10</b>

Mark from 1 to 10 your overall satisfaction with the studies: 0 no satisfied at all; 10 very satisfied.
